

Insurance Disclaimer

One of our goals at Children's Dental Care is to provide good customer service to the parents and patients of our practice. We strive to help our parents by submitting your child's dental claims to your insurance company. In this rapidly changing world our staff cannot know the complete details of every insurance plan. Therefore, we encourage everyone to know the dental benefits of your plan by referring to your insurance handbook or by calling and speaking with your insurance representative.

At the time of service, we will **estimate** your out of pocket expenses but this is **not** a guarantee of how your insurance will process the claim. All payments made at the time of service are only an **estimate**. After the insurance company reimburses our office there could be a final balance that will be due by you, the insurance policy holder. At that time we will send a final bill to your residence that will be due upon receipt of the statement.
